Dear Pro Silva delegate,

Pro Silva Slovakia is delighted to invite you to the Pro Silva AGM from Tuesday 28th to Friday 31st May, in Myjava, Slovakia.

Pro Silva Slovakia will introduce sustainable forest management in Western edge of West Carpathians, a mountain range with well-preserved biodiversity. We would like to share our achievements in application of close-to-nature forestry but also challenges which are ahead of us – mainly in upscaling the best practices among wide forestry community and increasing acceptance of close-to-nature approaches. We believe that sharing experiences at European scale in these issues can add value and bring benefits to our common endeavour. Excursions will bring us to the non-state (municipal) forests and also to state forest district of Duchonka where the forest managers apply close-to-nature principles in beech and oak forests as well as in converting artificial spruce forests to more diverse and resilient forest structures. Besides the expert topics, we also offer cultural programme – you will have an opportunity to experience treasures of our history, touch 600 years old oaks and taste local food.

Attached is a draft programme for the event, which will commence with registration of participants 14:00 – 15:00, Tuesday 28th May in Hotel Štefánik, Nám. M. R. Štefánika 37, 907 01 Myjava, Slovakia.
